

Week 2

Johnny Hinton, Sam Lazrak, Jerry Phan, and Ryan Hardin

- Items planned for the past week
 - Create all the pages and components setup
 - Focus on the backend work and make sure everything is working correctly
 - Work on routing and navigating through the site
- Planned items accomplished
 - The components are all setup
 - The backend is setup
- Road blocks (impediments) and your plan to address them
 - We don't have much experience with GraphQL, so a lot of our time was spent reading documentation.
 - We ran into a couple of compile errors when trying to run our site in the browser. We solved this by doing a quick google search and found a solution to our problem.
